

# Depth of Field Chart

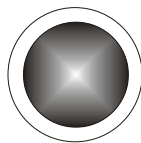

Variables: Lens focal length, focus distance, aperture

1, 2, 3 - Same lens, same aperture - as distance changes depth of focus changes.

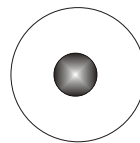

4, 5 - Same lens, same focus distance - as aperture changes, depth of focus changes.

6, 7, 8 - Same aperture, same focus distance, as lens focal length changes - depth of focus changes.

Aperture Example:

Large aperture = f2.8, f4  
shallow depth of field

Small aperture = f16, f22  
deep depth of field
